Boeing, Italian MoD Sign Contract for 767 Tanker Transports

"Right-sized" for optimum fuel offload and range, the 767 Tanker/Transport is the perfect solution to meet the air-refueling and transport needs for military services around the globe. Incorporating proven Boeing air-refueling technology and sharing commonality with more than 800 767 aircraft already in commercial and military use, the 767 Tanker/Transport offers low risk and low total ownership costs, while delivering maximum operational flexibility and performance.
