

Airline Demand for Boeing's Portable Maintenance Aid Grows 100 Percent

Airline Demand for Boeing's Portable Maintenance Aid Grows 100 Percent

The Boeing Portable Maintenance Aid puts an entire technical library of key maintenance information in a laptop computer that a mechanic can carry directly to the airplane. This digital tool streamlines the troubleshooting process by eliminating time-consuming and repeated trips to the crew room or airline reference library to look up maintenance data in paper manuals or on microfilm readers.
