Comanche Prototypes Fly Together for First Time

"Boeing Sikorsky RAH-66 Comanche Prototype Nos. 1and 2 flew together for the first time last month at the Comanche Team flight test facility in West Palm Beach, Florida. Prototype No. 1 continues envelope expansion and handling characteristic evaluation. Prototype No. 2 will evaluate Comanche's Mission Equipment Package (MEP), the aircraft's integrated digital target acquisition, navingation and communication system,beginning in 2001.
