Scandinavian Airlines System Buys A Boeing Next-Generation 737-800 With New Interior Design

Scandinavian Airlines System's (SAS) 11th Boeing Next-Generation 737-800 is sporting a new passenger-pleasing cabin configuration that features a new seating system, allowing the airline to vary the number of seats according to demand. The standard six-abreast seating rows easily can be converted to a more spacious five-abreast configuration. The airplane also features a popular extra-large lavatory with two windows in business class. The SAS Next-Generation 737-800 will seat 132 to 150 passengers.
