

Fredericksburg is Newest Location for Boeing Autometric Offices

Fredericksburg is Newest Location for Boeing Autometric Offices

Boeing Autometric, a global leader in geospatial information and technology solutions, has opened permanent offices in Fredericksburg, VA. Boeing Autometric is a unit of The Boeing Company [NYSE:BA]. The new offices will house about 70 Boeing Autometric employees in one 10,000-square-foot building located at 1320 Central Park Blvd, Suite 300. A majority of the work to be performed in Fredericksburg will be for one of Boeing's largest customers, the U.S. government.

"We are pleased to join the community of Fredericksburg as a permanent resident," said Tony Moraco, deputy general manager of Boeing Autometric. "Because of the proximity to our primary customers, this location here in Virginia is ideal for our employees supporting those programs. Also, because Fredericksburg presents such a highly attractive work environment, it strengthens our recruiting and retention efforts."

Headquartered in Springfield, VA, Boeing Autometric has more than 40 years of leadership in geospatial information technology and solutions, and is a leading provider of products and services for data storage, data warehousing, data production, and data visualization. Boeing Autometric supports customers in analysis, system design and engineering, software engineering, and data production. The company has approximately 800 employees.
