Boeing to Move 707 Air Force One to Reagan Library

Frank Gonsales, Boeing team leader for the disassembly of SAM 27000, removes the Presidential seal from the entry door of the former 707 Air Force One, formally marking the start of Boeing's effort to disassemble, move, and reassemble the airplane at the Reagan Presidential Library in Simi Valley, Calif. Reinstallation of the Presidential seal on the airplane in late 2004 will complete the project.
