

GPS Spacecraft Ready for Launch Aboard Boeing Delta II

GPS Spacecraft Ready for Launch Aboard Boeing Delta II

A Boeing [NYSE: BA] Delta II rocket is scheduled to launch a U.S. Air Force Global Positioning System, or GPS, satellite on March 31 from Space Launch Complex 17A, Cape Canaveral Air Force Station, Fla.

The launch of GPS IIR-9 will occur during a 15-minute launch window that opens at 4:54 p.m. EST. A Boeing Delta II 7925 configuration launch vehicle will be used for the mission. The spacecraft will be deployed 68 minutes after liftoff.

A unit of The Boeing Company, Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$25 billion business. It provides systems solutions to its global military, government and commercial customers. It is a leading provider of intelligence, surveillance and reconnaissance; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer and a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in launch services.
