

New Boeing 7E7 Image Features Innovative Design Concepts

Boeing [NYSE: BA] engineers are using a 7E7 concept design to push their thinking on more innovative exterior designs concepts including a refined nose shape, new wing tip concepts and a sculpted vertical tail structure. Engineers are studying these touches for consideration on the new 7E7, which is being designed as a super-efficient, twin-aisle airplane capable of carrying 200-250 passengers on long-range routes.
