# **Boeing Introduces 717 Business Express**

The Boeing Company is offering to corporate customers the 717 Business Express, a Boeing 717-200 that can be configured to carry from 40 to 80 passengers in first- and/or business-class, big jetliner comfort. It is designed to provide corporate employees with more productive space and improved use of travel time when compared to the typical business travel process.

The 717 Business Express will operate on routes with significant and regular employee movement between two or more of a corporation's key business facilities, saving transportation expense and valuable employee time.
