### MER-A Launch Aboard Boeing Delta II Delayed

Boeing and NASA officials have delayed the launch of NASA's Mars Exploration Rover-A spacecraft aboard a Boeing Delta II rocket from Cape Canaveral Air Force Station, Fla.

The cause of the delay was concern over thunderstorms and winds related to the thunderstorms in the Cape area.

The launch team will make another attempt Monday, June 9, at an instantaneous launch window of 2:02:23 p.m. EDT.

A unit of The Boeing Company, Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$25 billion business. It provides systems solutions to its global military, government, and commercial customers. It is a leading provider of intelligence, surveillance, and reconnaissance; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer and a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in launch services.
