

Boeing and NASA Scrub Delta II Launch of MER-B "Opportunity"

Boeing and NASA Scrub Delta II Launch of MER-B "Opportunity"

Boeing and NASA officials have scrubbed today's launch attempt of NASA's Mars Exploration Rover-B "Opportunity" spacecraft aboard a Boeing [NYSE: BA] Delta II rocket from Cape Canaveral Air Force Station, Fla.

The cause of the scrub was shifting winds aloft in the Cape area that affected the second launch window of 12:37:59 a.m. EDT today.

The first launch window of 11:56:16 p.m. EDT on June 28 was not utilized due to a combination of toxic wind concerns and mariner activity in the launch hazard area.

The next launch attempt will be today at 11:46:14 p.m. EDT. A second launch opportunity exists at 12:28:07 a.m. on Monday, June 30, if necessary.

A unit of The Boeing Company, Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$25 billion business. It provides systems solutions to its global military, government, and commercial customers. It is a leading provider of intelligence, surveillance, and reconnaissance; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer and a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in launch services.
