

Boeing Delta II Launch of NASA Satellite Scrubbed

Boeing Delta II Launch of NASA Satellite Scrubbed

Today's launch of a Boeing [NYSE: BA] Delta II rocket carrying the NASA Gravity Probe B satellite from Vandenberg Air Force Base, Calif., has been scrubbed for 24 hours.

Boeing and NASA officials halted the countdown approximately three minutes before liftoff after it was determined that there was insufficient time to confirm that the correct wind profile data had been loaded aboard the Delta II based on a weather balloon that was monitoring upper level winds.

The launch team will attempt to launch again tomorrow at an instantaneous window of 9:57:24 a.m. PDT.

A unit of The Boeing Company, Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$27 billion business. It provides systems solutions to its global military, government and commercial customers. It is a leading provider of intelligence, surveillance and reconnaissance; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer and a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in launch services.
