

Boeing Delivers Special-Livery 747-400 to China Airlines

Boeing Delivers Special-Livery 747-400 to China Airlines

A unique new Boeing 747-400 passenger airplane departs Everett 's Paine Field for a test flight prior to its delivery to China Airlines. The paint design is a special blending of China Airlines' distinctive plum blossom on the tail with the Boeing "blue" livery introduced during mid-2004. The airplane is also the first 747-400 to feature the Boeing Signature Interior.
