

Thomsonfly.com Launches Enhanced Interior Package for Boeing 757-200 and 767-200

Thomsonfly.com Launches Enhanced Interior Package for Boeing 757-200 and 767-200

UK-based carrier Thomsonfly.com is the launch customer for the Boeing Enhanced Interior Package on the Boeing 757-200 (shown here) and the Boeing 767-200. Elements of the Enhanced Interior Package in Thomsonfly.com's new interior include newly designed curved ceilings and larger, more rounded storage bins. The new interior is designed to improve comfort and passenger appeal and increase market competitiveness. The refreshed designs are fashioned after the interiors of the passenger-preferred Boeing 777. Thomsonfly.com is a member of the TUI Group, Europe's largest integrated tour package provider.
