

All Nippon Airways 777-300ER Demonstrates Quiet Jets Can Be Even Quieter

All Nippon Airways 777-300ER Demonstrates Quiet Jets Can Be Even Quieter

A 777-300ER for All Nippon Airways is flying a three-week flight test program at Boeing's Glasgow, Montana, test facility to prove what Boeing, GE, Goodrich and NASA experts believe will be significant reductions in aircraft and engine-noise levels. Testing includes various engine and nacelle chevron configurations.
