Boeing Unveils 787 Dreamliner Flight Deck

Boeing worked with airlines and pilots around the world to develop a flight deck that complements the unique improvements featured in the passenger cabin of the all-new 787 Dreamliner. A ll display formats in the 787 flight deck are the same as in the 777, including the flight management computer pages; the overhead (systems controls) layout is identical; the autoflight mode control panel layout also is identical.

Key features of the Dreamliner flight deck include larger displays, dual head-up displays and dual electronic flight bags.
