### **Inmarsat-4 Launch Delayed**

Today's scheduled launch of the Inmarsat-4 satellite was delayed due to an automated halt in the launch countdown system, prior to fueling. The launch team is currently reviewing the data from this system. On Sunday, the team will assess readiness to resume the countdown for launch on Monday, November 7.

Please check our website at [www.sea-launch.com](http://www.sea-launch.com) for further updates on this mission, or call the Sea Launch Hot Line, at 800.995.4123, for the latest information as it becomes available.

The Inmarsat-4 satellite is designed to provide high-speed mobile service to people throughout the Americas. It is one in a series of satellites designed to support the Broadband Global Area Network (BGAN).

Sea Launch will carry a live satellite feed and streaming video throughout the mission. Transponder coordinates for downlink will be posted at: [www.boeing.com/nosearch/sealaunch/broadcast.html](http://www.boeing.com/nosearch/sealaunch/broadcast.html). A simultaneous webcast will be available at: [www.sea-launch.com/current\\_index\\_webcast.html](http://www.sea-launch.com/current_index_webcast.html)

Sea Launch Company, LLC, headquartered in Long Beach, Calif., is the world's most reliable commercial launch services provider. With the advantage of a launch site on the Equator, the proven Zenit-3SL rocket can lift a heavier spacecraft mass or provide longer life on orbit, yielding best value plus schedule assurance. Sea Launch offers the most direct and cost-effective route to geostationary orbit. For additional information, please visit the Sea Launch website at: [www.sea-launch.com](http://www.sea-launch.com)
