Boeing to Showcase 777-200LR Worldliner, 787 Dreamliner, Rotorcraft and 767 Tanker Transport at Dubai Air Show 2005

The world's longest range passenger jet, fresh from setting the world distance record, will fly into the United Arab Emirates to lead The Boeing Company's [NYSE: BA] comprehensive presence at the Dubai Air Show beginning Nov. 20.

The 777-200LR, capable of providing direct, non-stop service between cities as far as 17,400 km apart when it enters service in 2006, completed a record flight of 22 hours and 42 minutes on Nov. 10 covering 13,422 statute miles (11,664 nautical miles or 21,601 kilometers).

"Boeing is coming to Dubai with terrific momentum across the enterprise and a strong commitment to helping its Middle East customers, partners and communities succeed," said Tod Hullin, Boeing senior vice president, Communications.

"The Middle East is very important to Boeing," said Hullin. "That is why we have based a new Boeing president in Saudi Arabia, opened a regional office in Dubai, strengthened community & education partnerships across the region, and made several other key executive appointments in the region."

Boeing Commercial Airplanes, Integrated Defense Systems, Boeing Capital Corp. and Connexion by Boeing^{SM} will all participate at this year's Dubai Air Show.

Boeing's schedule begins on Saturday, Nov. 19, with a press conference at 1430 hours for Boeing Commercial Airplanes and Boeing's Middle East leadership. On the same day, Integrated Defense Systems, with its Saudi Arabian partner Alsalam Aircraft Company, will co-sponsor the Middle East Air Chiefs conference. Boeing Capital Corp. also will host, for the first time in the Middle East, a financiers and investors conference, recognizing Dubai's leading regional role as a financial center. Similar events have been organized in New York, London and Hong Kong.

Integrated Defense Systems, in partnership with various customers, will showcase the AH-64 Apache, CH-47 Chinook, C-17 Globemaster III, and other platforms. The Boeing exhibit will highlight the 767 Tanker Transport, the world's most capable and advanced tanker aircraft, already delivered to the Italian Air Force. The Boeing 777-200LR (long range) will make its second flight to the Middle East in five months to participate at the show. Boeing's valued customer Royal Jet will display a Boeing Business Jet. And the 787 Dreamliner, the aviation industry's best-selling new airplane, will be showcased in the Boeing exhibit.

Boeing is sponsoring the Dubai 2005 Press Center and will hold a series of briefings on key programs and issues. Each day, media should check the briefing schedule at the Press Center for updates.
