

Boeing Lands F-15SG Contract with the Republic of Singapore

Boeing Lands F-15SG Contract with the Republic of Singapore

The Government of Singapore awarded Boeing [NYSE:BA] a contract to produce 12 F-15SG aircraft for the country's next generation replacement fighter jet, and an option for eight additional aircraft at a future date.

The F-15SG is an advanced version of the U.S. Air Force's F-15E Strike Eagle.

"We have been working toward this moment for several years and are excited and honored to provide the people of Singapore with the F-15SG, which will be equipped with the most technologically advanced avionics and weapons systems available," said Joe Hoerter, Boeing F-15 Program vice president. "Boeing will begin delivering the aircraft in 2008, which will allow the Republic of Singapore Air Force to begin replacing its retired A-4SU Skyhawks. All 12 aircraft will be delivered in 2008 and 2009."

The F-15SG will greatly enhance the capabilities and operational readiness of the Singapore Armed Forces.

Boeing has produced more than 1,500 F-15s during the past three decades. In addition to the United States, Korea, Japan, Saudi Arabia and Israel operate F-15 fleets.

A unit of The Boeing Company, Boeing Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$30.5 billion business. It provides network-centric system solutions to its global military, government, and commercial customers. It is a leading provider of intelligence, surveillance and reconnaissance systems; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer and a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in sustainment solutions and launch services.
