Boeing 787 Dreamliner Offers More for Passengers, Airlines

The Boeing 787 Dreamliner, scheduled for delivery beginning in 2008, provides passengers with a better flying experience and operators with a more efficient commercial jetliner. Using 20 percent less fuel per passenger than similarly sized airplanes, the 787 is designed for the environment with lower emissions and quieter takeoffs and landings. Inside the airplane, passengers will find cleaner air, bigger windows, more stowage space and improved lighting. The Dreamliner is the most successful commercial airplane launch in history.
