

Boeing Wins U.S. Air Force Combat Aircrew Training Contract

Boeing Wins U.S. Air Force Combat Aircrew Training Contract

The Boeing Company [NYSE: BA] today announced it has received a \$46 million U.S. Air Force contract to continue providing air combat instructor services for fighter aircraft to the U.S. Air Combat Command and Training Support Squadron.

"Boeing is pleased to be selected to continue providing this training to the U.S. Air Combat Command," said Keith Hertenberg, Boeing vice president of Training Systems and Services. "Our instructors are helping prepare aircrews for highly demanding operations around the world so they can employ their weapon systems with maximum effectiveness and return home safely."

The contract provides classroom, one-on-one and training-device instruction, including training in Distributed Mission Operations (DMO), a key force multiplier in preparing aircrews for the operational environment.

Boeing will provide training for the F-15C, F-15E, F-16 and F-22A platforms. It will be conducted at Cannon Air Force Base (AFB), N.M.; Eglin AFB, Fla.; Hill AFB, Utah; Langley AFB, Va.; Mountain Home AFB, Idaho; Seymour Johnson AFB, N.C.; and Shaw AFB, S.C.

Boeing has provided training to the Air Combat Command for more than 18 years and is the only contractor currently providing DMO instruction to combat aircrews around the world.

A unit of The Boeing Company, Boeing Integrated Defense Systems is one of the world's largest space and defense businesses. Headquartered in St. Louis, Boeing Integrated Defense Systems is a \$30.8 billion business. It provides network-centric system solutions to its global military, government, and commercial customers. It is a leading provider of intelligence, surveillance and reconnaissance systems; the world's largest military aircraft manufacturer; the world's largest satellite manufacturer; a foremost developer of advanced concepts and technologies; a leading provider of space-based communications; the primary systems integrator for U.S. missile defense; NASA's largest contractor; and a global leader in sustainment solutions and launch services.
