## **Boeing Delivers 1st In-Seat Video System on Next-Generation 737**

## Boeing Delivers 1st In-Seat Video System on Next-Generation 737

The Boeing Company recently delivered the first Next-Generation 737 equipped with an in-seat video entertainment system. The airplane, a Jet Airways 737-800, has 7-inch video monitors mounted in the back of every seat in economy class and 9-inch video monitors mounted in the seat arms in business class. The system offers passengers audio and video on-demand movies, games and in-fight information.
