### **Boeing Signs Agreement with Messier Services - Asia, SR Technics and Guangzhou Aircraft Maintenance Engineering Co, Ltd. to Provide Extended MRO Capability**

Boeing's [NYSE: BA] Commercial Aviation Services organization has reached an agreement with Messier Services - Asia, SR Technics and Guangzhou Aircraft Maintenance Engineering Co, Ltd. to perform repair and overhaul services on landing gear for Boeing airplanes.

Messier Services - Asia will support Boeing's 777 and Next-Generation 737 landing gear program while Guangzhou Aircraft Maintenance Engineering Co, Ltd. and SR Technics will support the Next-Generation 737 landing gear program.

These agreements are part of the Boeing Component Repair Network Service Centre (NSC) program within the Component Repair and Leasing Services group. The goal is to reduce overall repair costs and manage complex rotatable programs by establishing additional MRO support in key global regions.

All three of these world-class companies will join the repair network service centre program as part of a continuing strategy to reduce maintenance costs for airline customers and to provide faster repair and overhaul solutions of key rotatable components for Boeing customers around the world.

The Boeing Company is the world's leading aerospace company providing products and services to customers in 145 countries. Boeing Commercial Aviation Services, a unit of Boeing Commercial Airplanes, provides products, services and integrated solutions to improve fleet utilization, reduce costs, leverage leading-edge information management, and ensure passenger well-being.
