

Boeing 777-200LR Worldliner Changing How Passengers Travel Around the World

The Boeing 777-200LR Worldliner (Longer Range) has a maximum range of 9,450 nautical miles (17,500 km), making it the world's longest-range commercial jetliner. The Worldliner is capable of connecting virtually any two city pairs around the globe with nonstop service. The 777-200LR is the fifth and newest 777 model. The airplane first entered service with Pakistan International Airlines in March 2006.
