# Boeing Appoints Engineering and Technology Leader in India

## Naveed Hussain Named as Vice President, Engineering and Technology

**New Delhi, Jan. 24, 2008** -- The Boeing Company [NYSE:BA] announced today that Naveed Hussain will serve in India as its Vice President of Engineering and Technology.

"Naveed will strengthen our efforts to develop and implement engineering and technology strategies in this important and dynamic market that are mutually beneficial to India and Boeing," said John Tracy, Boeing senior vice president of Engineering, Operations and Technology and chief technology officer.

Hussain will report to Boeing's Office of Technology and to Ian Thomas, president of Boeing India. He will be based out of Boeing's India headquarters in New Delhi.

"Boeing is strengthening its presence in India and is deeply committed to the development of a strong aerospace industry. Naveed's addition to our in-country team is an important step forward and marks another significant milestone on our journey to becoming India's preferred aerospace and defence partner and provider," said Thomas.

Hussain has held numerous positions at The Boeing Company over the past two decades. Most recently he was director of Flight Engineering for Boeing Integrated Defense Systems, where he had functional management responsibility for 1,500 Flight engineers. Hussain has also provided technical leadership on security programs, as well as on numerous commercial and government programs, studies, and proposals. Additionally, he has been actively involved in leading strategic technology planning, R&D and product development processes. Hussain holds a Ph.D. from Stanford University in Mechanical Engineering and an M.B.A. from The Wharton School of Business, University of Pennsylvania.

Boeing is the world's leading aerospace company and the largest manufacturer of commercial jetliners and military aircraft combined. Additionally, Boeing designs and manufactures rotorcraft, electronic and defense systems, missiles, satellites, launch vehicles and advanced information and communication systems. As a major service provider to NASA, Boeing operates the Space Shuttle and International Space Station. The company also provides numerous military and commercial airline support services. Boeing has customers in more than 90 countries around the world and is one of the largest U.S. exporters in terms of sales. Headquartered in Chicago, Boeing employs more than 150,000 people across the United States and in 70 countries.
