

Boeing to Feature New Super Hornet Cockpit Display at CANSEC

Boeing to Feature New Super Hornet Cockpit Display at CANSEC

OTTAWA, Ontario, June 1, 2010— Boeing [NYSE: BA] will demonstrate a new, larger cockpit display as part of its F/A-18 Super Hornet simulator at the CANSEC 2010 defense and security trade show. The exhibition will be held June 2-3 in Ottawa.

The new display is a single-screen configuration that enables aircrews to view more battlespace information within a larger viewing area.

"The new, larger display is an option Super Hornet customers will be able to incorporate as they determine specific capabilities for their unique requirements," said Mike Gibbons, F/A-18E/F program manager for Boeing. "This new display is one example of the evolutionary approach of incorporating ever-increasing capabilities into the Super Hornet, with low risk for customers. We continue to expand the Super Hornet's multirole capabilities with continued on-cost and on-schedule performance for our customers."

The Boeing Super Hornet is a multirole aircraft, able to perform virtually every mission in the tactical spectrum, including air superiority, day/night strike with precision-guided weapons, fighter escort, close air support, suppression of enemy air defenses, maritime strike, reconnaissance, forward air control and tanker missions. Boeing has delivered more than 430 F/A-18E/Fs to the U.S. Navy. Every Super Hornet produced has been delivered on or ahead of schedule and on budget.

Boeing also is bringing the P-8A Poseidon demonstration trailer, which includes operator stations and a cockpit simulator, to CANSEC. A derivative of the highly successful and reliable Next-Generation 737, the P-8 is a long-range anti-submarine warfare, anti-surface warfare, intelligence, surveillance and reconnaissance aircraft. Other products being showcased at Boeing's booth include the C-17 Globemaster III airlifter, the CH-47 Chinook helicopter, the V-22 Osprey tiltrotor, and the ScanEagle unmanned aerial vehicle.

Boeing has been a major contributor to the Canadian economy since 1919, generating approximately \$1 billion in business annually. The company employs highly skilled workers in Nova Scotia, Quebec, Ontario, Manitoba, Alberta and British Columbia in support of its commercial and defense business units. Canada also is home to one of Boeing's largest international supplier bases, with more than 200 suppliers in every region of the country, providing a diverse mix of high-value goods and services to Boeing and its customers.

A unit of The Boeing Company, [Boeing Defense, Space & Security](#) is one of the world's largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world's largest and most versatile manufacturer of military aircraft. Headquartered in St. Louis, Boeing Defense, Space & Security is a \$34 billion business with 68,000 employees worldwide.
