Boeing Demonstrates New Situational-awareness Application for Portable Devices

NEW ORLEANS, Nov. 2, 2010-- The Boeing Company [NYSE: BA] will demonstrate its DataMaster Lite (LT) situational-awareness application for military and civilian users of the latest portable devices, including the iPad, this week at the GEOINT Symposium in New Orleans.

DataMaster LT is a mobile software application that allows government users to browse video and imagery information.

"With the flexibility inherent in mobile platforms, this new application adds a better level of situational awareness to our customers' most critical missions," said Dewey Houck, director of Mission Systems for Boeing Intelligence & Security Systems. "With its ability to quickly search for and retrieve critical information, DataMaster LT gives intelligence analysts access to timely, relevant geospatial information that, in turn, provides a foundation for situational awareness."

In addition to DataMaster LT, Boeing also will demonstrate the DataMaster 5.0 product suite at GEOINT. The suite includes cloud-ready (web-based) applications and supports the common querying and secure sharing of large datasets, including video, imagery and maps.

Boeing provides the subject matter expertise, technical excellence, and operational experience required to support the U.S. Intelligence Community and international allies. The company also supports ground-based and other integrated intelligence and security solutions for a variety of U.S. government customers and is a world leader in the design, development and manufacture of satellites for government, civil and commercial customers.

A unit of The Boeing Company, Boeing Defense, Space & Security is one of the world’s largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world’s largest and most versatile manufacturer of military aircraft. Headquartered in St. Louis, Boeing Defense, Space & Security is a $34 billion business with 68,000 employees worldwide. Follow us on Twitter: @BoeingDefense.
