# Boeing's Tapestry Subsidiary to Update Airlift Planning System

## Contract includes software development, operations and training for military mobility scheduling

## Inserts new technology to enhance global reach

**SAN DIEGO, Oct. 27, 2011** -- Boeing [NYSE: BA] today announced that its wholly owned subsidiary Tapestry Solutions is part of an industry team selected to upgrade and support the U.S. Air Force Air Mobility Command's Consolidated Air Mobility Planning System (CAMPS). As a subcontractor to SAIC, Tapestry was awarded a six-year contract valued at up to $15 million.

Under the contract, Tapestry's engineering support team will insert new software technology into CAMPS, an airlift and air-refueling mission planning and scheduling system used since 1990 across the Department of Defense for peacetime, crisis, contingency and wartime operations. Tapestry also will lead operations and training for the updated web-services-based system.

As the developer of a cornerstone component of the principal planning system for airlift worldwide, Tapestry will be able to apply its suite of planning, optimization and disruption-management software applications to enhance mission readiness.

"The CAMPS win is a tribute to the team that developed a cost-saving, low-risk solution for the government," said Tony Rigazzi, senior director of Strategic Programs for Tapestry. "As defense budgets shrink, new ways of satisfying warfighter requirements with innovative solutions will win the day in today's fiercely competitive environment."

Tapestry Solutions, headquartered in San Diego, forms the core of the Logistics Command and Control subdivision of the Defense & Government Services division of Boeing Defense, Space & Security. Tapestry is a leading innovator of custom software development, training, consulting and support services to the U.S. military, civil government, and the private sector.

A unit of The Boeing Company, Boeing Defense, Space & Security is one of the world's largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world's largest and most versatile manufacturer of military aircraft. Headquartered in St. Louis, Boeing Defense, Space & Security is a $32 billion business with 64,000 employees worldwide. Follow us on Twitter: @BoeingDefense.
