

Boeing to Open First Cyber Analytics Center Outside the US in Singapore

Boeing to Open First Cyber Analytics Center Outside the US in Singapore

Will provide secure, collaborative environment for Asia-Pacific customers to address cybersecurity threats

SINGAPORE, Sept. 22, 2014 – Boeing [NYSE:BA] will open its first Cyber Analytics Center outside the U.S. in Singapore, to bring advanced cybersecurity capabilities and services to customers in the Asia-Pacific region.

The center will help train and equip cybersecurity professionals, perform advanced analytics and serve as Boeing's regional cybersecurity center of excellence. Boeing will hire and train cybersecurity professionals in Singapore to staff the center.

"Boeing is a leader in cybersecurity from the U.S., and we warmly welcome Boeing's decision to establish the Cyber Analytics Center in Singapore," said Gian Yi-Hsen, director of the Singapore Economic Development Board's Safety & Security Industry Programme Office. "This center is a first for Boeing internationally and a significant addition to the cybersecurity industry in Singapore to meet the growing demands of the region."

"We are taking our Singapore partnership to a new level with this Cyber Analytics Center aimed at boosting cybersecurity in the city-state and beyond," said Skip Boyce, president of Boeing Southeast Asia. "Boeing already has a strong business presence here, comprising commercial airplane and defense procurement, aircraft maintenance and research and technology work."

A key feature of the facility will be the ability for customers to share timely and actionable information. The center will also provide a collaborative environment for security professionals to work with industry partners, customers and academia to solve complex, cybersecurity challenges.

"We've established this center to address current and evolving cybersecurity challenges in the Asia-Pacific region," said Per Beith, director of Boeing's Information Security Solutions. "The risks to critical infrastructure and governments worldwide continue to grow, and this center demonstrates Boeing's – and Singapore's – commitment to addressing the cyber threat."

A unit of The Boeing Company, [Boeing Defense, Space & Security](#) is one of the world's largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world's largest and most versatile manufacturer of military aircraft.
