

## Newest Boeing GPS IIF Launched, Signals Indicate Satellite Working Properly

# Newest Boeing GPS IIF Launched, Signals Indicate Satellite Working Properly

GPS constellation achieving greater accuracy as modernization continues

**CAPE CANAVERAL AIR FORCE STATION, Fla., Oct. 29, 2014** – The 8<sup>th</sup> Boeing [NYSE: BA] Global Positioning System (GPS) IIF has signaled controllers it is functioning properly after launching today, marking another step in the modernization of the satellite constellation that's relied on by millions of people worldwide.

This was the fourth, and final, GPS IIF launch scheduled for the U.S. Air Force this year. Liftoff from Florida's Cape Canaveral Air Force Station, on a United Launch Alliance Atlas 5 rocket, occurred at 1:21 p.m. Eastern time, with signal acquisition about three and a half hours later. The satellite is to enter full operational service during December.

"The schedule this year has put the GPS team through its paces, with launches occurring approximately every three months to continue GPS modernization," said Dan Hart, vice president of Government Space Systems at Boeing Network & Space Systems. "We typically were processing two satellites concurrently at the Cape, requiring strong execution, an unrelenting focus on mission assurance and solid team work with the Air Force and United Launch Alliance."

The next GPS IIF launch is expected during the first quarter of 2015. The Air Force ordered 12 in total, and four remaining satellites are stored and maintained at the Boeing Satellite Development Center in El Segundo, Calif. The GPS IIFs are continuing modernization with improved accuracy and anti-jamming as well as bringing into service the new civil L5 signal.

A unit of The Boeing Company, [Boeing Defense, Space & Security](#) is one of the world's largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world's largest and most versatile manufacturer of military aircraft. Headquartered in St. Louis, Boeing Defense, Space & Security is a \$33 billion business with 56,000 employees worldwide. Follow us on Twitter: [@BoeingDefense](#).
