

Jeppesen Terminal Charts Now Available Through Honeywell GoDirect Flight Bag Pro Platform

Jeppesen Terminal Charts Now Available Through Honeywell GoDirect Flight Bag Pro Platform

Jeppesen data enhances GoDirect user experience on iPad or front panel avionics for business aviation operators

ENGLEWOOD, Colo., March 15, 2018 — Boeing [NYSE: BA], through its subsidiary Jeppesen, today announced the continued integration of data services for business aviation operators with the introduction of Jeppesen’s global digital terminal chart data to the Honeywell GoDirect Flight Bag Pro electronic flight bag platform.

The Honeywell GoDirect Flight Bag Pro app allows business aviation pilots to create flight plans, view weather conditions and access flight briefing information through a unified user platform. Now with Jeppesen chart access, operators will be able to make more informed decisions while researching an airport, selecting departure procedures while flight planning or referencing their trip kit information.

Jeppesen charts are easily accessed through the GoDirect platform. Operators sign in to access their Jeppesen data subscription and download the charts they need for their flight.

“Many Honeywell GoDirect customers are also Jeppesen data subscribers, and strong customer demand led to the integration of Jeppesen chart data in GoDirect,” said Scott Reagan, Jeppesen OEM Client Management. “This data integration continues a long-standing relationship between the companies to provide trusted Jeppesen data across numerous popular Honeywell avionics systems.”

Jeppesen navigation data (NavData) is developed from a comprehensive aviation database, which is composed of more than one million records. To ensure accuracy, Jeppesen flight information analysts edit and verify approximately 150,000 database transactions generated from worldwide aviation data source documents during every 28-day revision cycle.

For further detail on the industry-leading navigation operations, training and optimization solutions provided by Jeppesen, visit www.jeppesen.com.

About Boeing Global Services

Boeing Global Services, headquartered in the Dallas area, was formed by integrating the services capabilities of the government, space and commercial sectors into a single, customer-focused business. Operating as a third business unit of Boeing, Global Services provides agile, cost-competitive services to commercial and government customers worldwide.
