Boeing and Flightdocs Enter Exclusive Partnership

Companies sign MOU to integrate Flightdocs Enterprise platform with Boeing Global Services' offerings from Aviall, Inventory Locator Services and Jeppesen

Together, partners will offer enhanced, cloud-based aviation maintenance, compliance and inventory management solutions for business and general aviation operators.

ORLANDO, Fla., Oct. 15, 2018 /PRNewswire/ -- Boeing [NYSE: BA] and Flightdocs have entered into a multi-year agreement to exclusively market and sell the Flightdocs Enterprise platform, a full-service maintenance, compliance and inventory management solution for the business and general aviation market.

The companies have also entered into a memorandum of understanding (MOU) to integrate the Flightdocs Enterprise platform with Boeing Global Services' portfolio of companies, products and services including Aviall, Inventory Locator Services, and Jeppesen.

"We are excited to partner with Boeing, the recognized leader in aviation worldwide," stated Rick Heine, CEO of Flightdocs. "Together, we are working towards delivering incredible, integrated tools that will transform business and general aviation operations by offering efficiency and cost savings to operators of all brands and aircraft types across the globe."

This partnership strengthens Boeing Global Services' broad portfolio of products of services with Flightdocs' industry-leading, cloud-based aviation maintenance, compliance and inventory management Software as a Service (SaaS) solution.

"Our exclusive agreement with Flightdocs will deliver end-to-end, industry-first solutions to business and general aviation operators," said William Ampofo, Vice President, Business & General Aviation, Boeing Global Services. "We look forward to exploring future expansion of our partnership as we collaborate on innovative solutions for this market."

Boeing and Flightdocs will exhibit at the 2018 National Business Aviation Association Business Aviation Convention & Exhibition (NBAA-BACE) being held at Orlando's Orange County Convention Center October 16-18.

Operating as one of Boeing's three business units, **Global Services** is headquartered in the Dallas area. For more information, visit www.boeing.com/services.

Flightdocs provides mission-critical cloud-based maintenance, compliance and inventory management Software as a Service (SaaS) solutions to the aviation industry. The company's solutions assist aircraft owners and operators in tracking and managing the maintenance and airworthiness of their aircraft, comply with rigorous safety rules and regulatory guidelines, reduce costs, mitigate risks and minimize asset downtime. Flightdocs' customers include Fortune 1000 corporate flight departments, air charters, air medical providers, fractional aircraft operators, government agencies, and regional carriers. Headquartered in Bonita Springs, Florida, Flightdocs has been serving the aviation industry for over 15 years.
