Boeing Awarded US Military Load Planning and Tracking Sustainment Contract

Integrated Computerized Deployment System supports U.S. Transportation Command and U.S. DOD Customers worldwide

SAN DIEGO, Nov. 7 2019 — Boeing (NYSE: BA) was awarded a re-compete contract from the U.S. Transportation Command (USTRANSCOM) to enhance and sustain the Integrated Computerized Deployment System (ICODES). ICODES is a logistics software application that automates load planning and tracks cargo movements across land, air and sea for the U.S. Department of Defense (DOD).

ICODES provides near real-time, end-to-end planning, tracking and forecasting of cargo stowage for aircraft, ships, rail and terminal yards, and supports unit move activities. The system's ability to interface with multiple transportation and defense information systems enables users to seamlessly exchange critical data across the defense transportation network.

"With ICODES, our customers have a common operating picture for managing global cargo and passenger movements. It helps ensures safe, efficient cargo placement while significantly reducing load planning time and operational costs," said Debbie Churchill, vice president, Mission Products & Services, Tapestry Solutions. "This award is a true testament of our customer-first commitment and deep domain experience across USTRANSCOM's Joint Deployment and Distribution Enterprise."

Work is being performed by Tapestry Solutions, part of Boeing Global Services, and teammates UNCOMN LLC and Jasper Solutions, Inc.

ICODES was originally developed in 1993 at a California Polytechnic State University (Cal Poly) research lab in San Luis Obispo and culminated into a small business effort. Boeing acquired the business and later transferred the ICODES program to Tapestry under a contract novation agreement.

Today, the Service Oriented Architecture-based ICODES system serves as the DOD's program of record for multimodal load planning.

Boeing is the world's largest aerospace company and leading provider of commercial airplanes, defense, space and security systems, and global services. As the top U.S. exporter, the company supports commercial and government customers in more than 150 countries. Boeing employs more than 150,000 people worldwide and leverages the talents of a global supplier base. Building on a legacy of aerospace leadership, Boeing continues to lead in technology and innovation, deliver for its customers and invest in its people and future growth.
