Boeing Launches New MicroTAC Tactical Data Analytic Platform

Field deployment allows data-management capability anytime, anywhere

ANNAPOLIS JUNCTION, Md., May 20, 2014 – Boeing [NYSE: BA] has developed a new tactical data analytic suite – called MicroTAC – that provides an information advantage to the warfighter, even when network connectivity may be unavailable or unsuitable for the mission.

While tactical data analysis usually is network-based and requires an Internet connection, a MicroTAC user can accept new data, such as from a flash drive, search and analyze it, and confirm predictive analytics while disconnected from networks.

Running on a lightweight, battery-powered portable device similar to a laptop, MicroTAC can continuously accept data in the field and almost immediately provide an accurate picture of the unfolding information environment.

“When warfighters bring MicroTAC into theater, they have a full suite of deployable analytic technologies at their fingertips to take in, analyze and disseminate information in near real-time, especially when communications are unreliable,” said Jeff Brown, director of Boeing’s Intelligence Systems Group. “This may also be important during missions when having a network connection could be detrimental or undesirable.”

Boeing will show the MicroTAC platform with live demonstrations at the Special Operations Forces Industry Conference, May 20-22 in Tampa, Fla.

MicroTAC is fully integrated with Boeing’s existing TAC software and is available to new and current TAC customers.

Launched in 2006, the TAC line of products is a trusted and widely-used knowledge management technology that persistently monitors data and extracts relevant information in real time.

A unit of The Boeing Company, Boeing Defense, Space & Security is one of the world's largest defense, space and security businesses specializing in innovative and capabilities-driven customer solutions, and the world’s largest and most versatile manufacturer of military aircraft. Headquartered in St. Louis, Boeing Defense, Space & Security is a $33 billion business with 56,000 employees worldwide. Follow us on Twitter: @BoeingDefense.
