Next Boeing GPS IIF Satellite Arrives at Cape Canaveral for Launch

Cape Canaveral Air Force Station, Fla., Sept. 17, 2013 -- Boeing [NYSE: BA] workers lift the Global Positioning System (GPS) IIF-5 satellite onto a transporter following its Aug. 1 arrival at the Navstar Processing Facility on Cape Canaveral Air Force Station, Fla.

Boeing shipped the fifth GPS IIF satellite from its satellite factory in El Segundo, Calif., on a U.S. Air Force C-17 airlifter. Workers will fuel the satellite and integrate it with a United Launch Alliance Delta IV rocket prior to launch in October. The GPS IIFs continue to meet mission requirements as they are added to the on-orbit constellation, achieving the greatest accuracy ever and ensuring highly accurate position, timing and navigation services to a global user community.
