Boeing Logistics Contract Builds on Decades of Support for Israel Apaches

Services package will enhance Apache sustainment capabilities for the Israeli Air Force

TEL AVIV, Israel, April 20, 2021 — Boeing [NYSE: BA] today announced a contract to provide the Israeli Air Force (IAF) with integrated logistics support for Israel's AH-64A-model and D-model Apache helicopters.

The direct commercial sale, awarded in December 2020, is a five-year follow-on contract that builds on Boeing's current IAF Apache support. Boeing will deliver logistical, program, engineering and technical support, A- and D-model technical publications, D-model unique repairs, an in-country field service representative, and overhaul material kits for various drivetrain systems, including transmissions and gear boxes.

"This tailored support package and Boeing's decades of vertical lift experience bring superior global sustainment expertise to our Israeli customer and elevates the capability of their Apache fleet to support key missions," said Indra Duivenvoorde, director of Europe and Israel services for Boeing.

Boeing has been delivering support for the IAF's fleet of Apache helicopters for decades and currently provides transactional spares, A-model repairs, support and test equipment, and engineering project support for the IAF. A Boeing field service representative has been co-located with the customer since 1991 to provide on-site technical support.

In addition to the U.S. Army, Israel is one of 16 partner nations around the globe operating the Apache as its primary attack helicopter, with multiple global defense forces expressing high interest. More than 2,500 helicopters have been delivered worldwide.

Boeing is the world's largest aerospace company and leading provider of commercial airplanes, defense, space and security systems, and global services. As a top U.S. exporter, the company supports commercial and government customers in more than 150 countries, leveraging the talents of a global supplier base. Building on a legacy of aerospace leadership, Boeing continues to lead in technology and innovation, deliver for its customers and invest in its people and future growth.
