Boeing Engineering Partners with Łukasiewicz – Institute of Aviation

- Boeing signed an agreement with the Łukasiewicz – Institute of Aviation.

- Boeing and Łukasiewicz – Institute of Aviation engineers started collaborating on engineering design, analysis and support projects at the Institute's headquarter in February.

WARSAW, Poland, Feb. 21, 2023 – Boeing [NYSE: BA] and the Łukasiewicz – Institute of Aviation recently signed an agreement for close collaboration on engineering design, analysis and support projects. Engineers from the leading aerospace manufacturer and the Polish research institute started working together at a facility in Warsaw this month.

The agreement is part of Boeing's strategy to expand its engineering footprint in Poland. Already present in the country for 30 years, the company is currently hiring for a variety of skills and experiences to grow its local engineering workforce.

Boeing and the Łukasiewicz – Institute of Aviation are teaming up to leverage local capabilities, utilizing the Institute's vast engineering resources and facilities. The cooperation is taking place on a project basis, with an initial focus on commercial airplanes and services. This scope is to be extended to additional programs including research and development.

"We are honored to work alongside an institute that looks back at almost a century of engineering excellence in aviation," said Iryna Bielenko, director of the Boeing Poland Engineering & Technology Center. "Its long-standing experience, efficient processes and capabilities make the Łukasiewicz – Institute of Aviation the ideal local partner to advance aerospace innovation together."

Dr. Eng. Paweł Stężycki, director of the Łukasiewicz – Institute of Aviation added, "It is a testimony to our researchers' skills to be chosen to work alongside Boeing engineers. We will develop cutting-edge technologies advancing the products of one of the most innovative and renowned aerospace companies in the world."

About Boeing

Boeing, a global leading aerospace company, has been present in Poland for more than 30 years. Employees at the Boeing sites in Warsaw, Gdańsk and Rzeszów are supporting our mission to develop, manufacture and service commercial airplanes, defense products and space systems for customers worldwide. We are a major partner of Polish industry and hold strong relationships with local partners, airlines and suppliers as well as the Polish government and society. Join our team and become part of an innovative company where your ideas will fuel the development of technologies that are shaping the future of flight at [Boeing.com/PolandJobs](https://www.boeing.com/PolandJobs)

About the Łukasiewicz – Institute of Aviation

The Łukasiewicz Research Network – Institute of Aviation is one of the most modern research facilities in Europe, with traditions dating back to 1926. The Institute closely cooperates with global tycoons of the aviation industry, such as: Boeing, GE, Airbus, Pratt & Whitney, and institutions from the space industry, including the European Space Agency. Strategic research areas of the Institute are aviation, space and unmanned technologies. It also provides research and services for domestic and foreign industries in the field of materials, composite, additive, remote sensing, energy and oil & gas technologies.
