

Boeing and Indonesia Partner to Explore Air Traffic Management Improvements

Boeing and Indonesia Partner to Explore Air Traffic Management Improvements

- Boeing to work with AirNav Indonesia
- Joint effort will support safe, efficient and sustainable aviation.

JAKARTA, Indonesia, June 12, 2023—Boeing [NYSE: BA] has signed an agreement with AirNav Indonesia to explore initiatives to further enhance the safety and efficiency of Indonesia’s national air traffic management system.

Improving airport and flight operations can help increase the safety and sustainability of Indonesia’s aviation system through more efficient movement of aircraft and reduced fuel use.

The Memorandum of Understanding (MOU) brings together Boeing’s engineering expertise with the Indonesian government’s key initiatives in airspace management, training and air traffic management strategic planning. Boeing and AirNav will work closely with the Directorate General of Civil Aviation of Indonesia, local airlines, airport operators and other aviation stakeholders in the country.

“AirNav Indonesia is focused on making sure that our airspace system adopts and maintains the highest levels of safety while fostering the growth of Indonesia’s civil aviation industry,” said Mdm. Polana B. Pramesti, President Director of AirNav Indonesia. “Airspace capacity and air traffic management is a shared interest between Boeing and AirNav and a natural space where we need to cooperate. We look forward to this collaboration with Boeing.”

“With its emerging market economy, Indonesia is home to one of the largest aviation markets in Asia,” said Mike Sinnett, senior vice president and general manager of Product Development for Boeing Commercial Airplanes. “We’re committed to supporting Indonesia’s civil aviation industry and excited to work with AirNav to explore lasting solutions that safely and sustainably enhance Indonesia’s air traffic management system.”

Boeing and Indonesia have worked in partnership for over 74 years to support the development of aerospace and defense capabilities in the country through training, supply chain, and collaborations. Today, Boeing’s presence in Indonesia covers commercial aviation, defense, space, supply chain, and academia partnerships.

As a leading global aerospace company, Boeing develops, manufactures and services commercial airplanes, defense products and space systems for customers in more than 150 countries. As a top U.S. exporter, the company leverages the talents of a global supplier base to advance economic opportunity, sustainability and community impact. Boeing's diverse team is committed to innovating for the future, leading with sustainability, and cultivating a culture based on the company's core values of safety, quality and integrity.
